Ear Care Update

22/01/18

Explore the anatomy and physiology of the ear,
discover commonly presented complaints and
learn how to manage such complaints.

This is an update specifically for HAST and South Tees and
Darlington CCG students which is available to both Practice
Nurses and Healthcare Assistants.

**Corporate
and
Professional
Education**

Ear Care Update

Why us?

The update will take place in the Sciences Complex which contains the Living Lab, an integrated facility, supported with IT connectivity that enables a range of patient journeys and scenarios to be modelled.

What is the course content?

The sessions are created and delivered by practitioners who specialise within their area of nursing. Years of experience and knowledge has provided a great interest from practitioners in wanting to attend such sessions.

Topics covered include:

Anatomy and physiology of the ear

Common presenting complaints and their management

Principles of ear irrigation

Application and funding?

Applicants must be a Registered Nurse or Healthcare Assistant and have prior recognised ear care training

This update has been commissioned by Health Education England. The fee for this course is £110 but applicants may be eligible for HEE funding

To apply for this course, please use our downloadable application form. Information on how to complete the form and where to send it can be found on the form. Please contact the Corporate and Professional Education team for further information about applying for this course
